

OPTIONAL SERVICE - VIP TARMAC (DRIVE ON/OFF RAMP)

WHY NOT TRY OUR VIP TARMAC SERVICE - THE QUICKEST WAY TO ARRIVE AND DEPART COPENHAGEN AIRPORT

Here at ASE we understand time is important. We have created an optional service called VIP Tarmac which in turn will greatly speed up the arrival and departure experience.

This service allows passengers to be picked up directly at the aircraft door via their limousines, then drive straight out the airport without experiencing the usual formalities which are conducted in the main Airport building.

On departure, the reverse applies, and clients drive straight into the airport to the awaiting aircraft. ASE perform all the pre-advanced processes with customs, immigration and security. We coordinate all limousine access, and we ensure that the experience is extremely efficient. In order to conform to the local CAA security regulations,

ASE will provide a mobile x-ray screening unit at the Aircraft or parking area, and security checks will be conducted at the aircraft door. Clients arriving or departing to a non-Schengen Airport may require their passports to be stamped, if this is required ASE will stop en route to the aircraft and the local police will visit the limousine to check documentation without the passengers or baggage leaving the vehicle.

What we need from you

1. Please ensure that you send ASE Handling a passenger manifest 24hr before Arrival or Departure
2. Please also let us know which limousine company you are using, or which private driver (name/contact)

Location For Airside Entrance

The arrival and departure limousine check-in point is located at the Airport main security gate. All local limousine companies know this gate. The address for the GPS is Hovedvagt, Kystvejen 16 , Kastrup , DK2770, Denmark.
